

FAMILY DAYS - LUNA PARK

November 2011

A great day was held at Luna Park and attended by 42 members. It marked two occasions; the last Family Day for 2011 and the return to Luna Park since the last time, when we were totally washed out. The day started off with grey clouds and ended with a beautiful blue sky and sunshine.

A late decision was to have Subway as the meal of the day and with 84, 4"

Subs and 48 bottles of water all the kids and parents had a great time. Fortunately, the Subs were consumed after the stomach turning rides. It was obvious that many adults were reliving their childhood days at Luna Park and their kids were experiencing the excitement for the first time.

It was great to see and ride the Scenic Railway; I am not sure if it's old age but that ride really knocks the old

bones around. It was a great experience either way. It was good to see so many new families and to see how friendships were struck up instantly. A young girl who came for the first time had never met another kid with Tourettes. Within 5 minutes she was with a new found friend and rushing from ride to ride.

FAMILY DAY at LUNA PARK

We did the usual TSAV Family day and sent my son Ben on the mission to take control of a table area, under cover for the adults so that they could openly discuss the challenges we all face as parents.

By 5pm we were all but worn out and with our stomachs doing cart wheels we all headed for home.

A big thank you to Susan and Nick for their help and support during the day. It freed me up to have my child hood mid life crisis and also ensured a great day by all. Thanks to all the families and kids that came and participated.
